

## **PROFESSOR ELLIS DOWNES FEATURED IN THE TATLER DOCTORS GUIDE 2013**

Professor Ellis Downes has been selected by a panel of distinguished GPs and fellow consultants, to be included in a guide to Britain's 250 best doctors. Produced as a supplement by Tatler magazine, the 'Doctors Guide', now in its fourth edition, recognises the brightest and most respected surgeons, doctors and medical experts in the UK.

Covering 34 categories, from allergies, through gynaecology and obstetrics to vascular surgery, the guide's introduction from its editor, Jessie Hewitson, states: "Our aim was to make it simple to find the leading, most experienced consultants. To do this Tatler assembled a panel of respected GPs and top-of-their-tree surgeons and physicians, and asked them who are the best in their fields. Which doctors, in short, they ask to treat their own families. For anyone searching for the right doctor who wants to start at the top, this is the guide for them."

Speaking on Professor Ellis Downes work in field of gynaecology and obstetrics the Tatler guide states, "Known for a sympathetic style, as well as for treating a broad range of gynaecological problems, Downes also delivers babies. He is a former Daily Mirror 'doctor', who helped introduce microwave endometrial ablation – removing the lining of the uterus – to the UK, helping thousands of women with heavy periods who might otherwise have been given a hysterectomy. His teenagers and a passion for golf distract him at the weekends."
